# 1 STAFF CONTACT DETAILS

Lecturer-in-charge: Dr Shiko Maruyama  
Room: Quadrangle Building, Room Q3116 (Green)  
Phone No: 9385 3386  
Email: [s.maruyama@unsw.edu.au](mailto:s.maruyama@unsw.edu.au)  
Consultation Times – TBA (or by appointment)

## 1.1 Communications with staff

You should feel free to contact the lecturer about any course specific inquiries. The lecturer may be contacted by email, during consultation time, or by appointment. Specific consultation hours will be posted on the course website.

Some information concerning administrative matters may also be obtained from the School of Economics Office on the fourth floor of the ASB Building.

# 2 COURSE DETAILS

## 2.1 Teaching Times and Locations

Tuesday noon – 3 pm @ LEC/A CLB 3  
Lectures start in Week 2 (on March 9) and continue to Week 13.

## 2.2 Units of Credit

The course is worth 6 units of credit.  
This course is taught in parallel to both undergraduate and postgraduate students.

## 2.3 Summary of Course

Welcome to ECON 4102 / 6301! This is a course intended for honours and post graduate students interested in theoretical and empirical industrial organization. The main goal of this course is to provide students with a set of tools and knowledge so that they can critically read recent research papers and conduct their own original theoretical/empirical research in industrial organization. Particularly we focus on how firms exercise market power. The course consists of two parts: theory part (Classes 1 - 5) and empirical part (Classes 6 - 12). The assessment consists of Theoretical Problem Set (10%), Theory Project (10%), Empirical Problem Sets (10%), empirical part class participation (10%), and Final Exam (60%).

## 2.4 Aims and Relationship to Other Courses

### 2.4.1 Aims

The main goal of this course is to provide students with a set of tools and knowledge so that they can critically read recent research papers and conduct their own original theoretical/empirical research in industrial organization. Particularly we focus on investigation into how firms exercise market power in a variety of settings and how the government may curb the negative side effects through regulation. We will develop rigorous theoretical models and empirical methodologies maintaining its close connections to reality, elaborate on economic logic and intuitions behind the analyses, and discuss real-world implications. Through this approach students learn how to apply economic theories and empirical methods to analyse a variety important issues. Both monopoly and oligopoly market structures will be considered.

The course consists of two parts: theory part (Classes 1 - 5) and empirical part (Classes 6 - 12). In the theory part, we will discuss:

- Monopolistic markets
- Oligopolistic industry structure
- The role of government regulation
- Firm strategies over prices, location choice, product characteristics, entry and exit, and mergers
- Dynamic competition and collusion

In the empirical part, we will read empirical research papers and discuss how these topics can be analysed with the real-world data and why it is relevant. Most papers we read will be challenging so that students will be exposed to the research frontier. Special attention will be paid to how to critically read challenging recent empirical papers.

#### 2.4.2 Prerequisite and Relationship to Other Courses

This course requires that you have completed QMA (ECON1202), QMB (ECON1203), and intermediate microeconomics (ECON2101) (or equivalent courses). **In addition, this course assumes your knowledge of intermediate econometrics**, so your completion of two econometrics courses such as ECON2206 and ECON2207 is strongly recommended. In particular, it is assumed that you have a solid understanding of basic game theory, elementary calculus, basic statistics and linear regression models, plus some knowledge of the method of maximum likelihood and discrete choice model estimation such as the Probit model.

#### 2.5 Student Learning Outcomes

On completion of the course, students should be able to:

1. Analyse market power of firms theoretically and empirically;
2. Solve game theoretic models of oligopolistic markets;
3. Construct and present their own theoretic models of oligopolistic markets;
4. Evaluate the welfare implications of strategic behaviour;
5. Critically evaluate and discuss empirical research in this field; and
6. Distinguish the reduced-form approach and the structural approach in empirical research.

#### Graduate Attributes

Course Learning Outcomes	ASB Graduate Attributes
1, 2, 3, 4, 5	1. Critical thinking and problem solving
3, 5	2. Communication
3, 5	3. Teamwork and leadership
4	4. Social, ethical and global perspectives
1, 2, 3, 4, 5, 6	5. In-depth engagement with relevant disciplinary knowledge
1, 2, 3, 4, 5, 6	6. Professional skills

### 3 LEARNING AND TEACHING ACTIVITIES

### 3.1 Approach to Learning and Teaching in the Course

The philosophy underpinning this course and its Teaching and Learning Strategies are based on “Guidelines on Learning that Inform Teaching at UNSW. These guidelines may be viewed at: [www.guidelinesonlearning.unsw.edu.au](http://www.guidelinesonlearning.unsw.edu.au). Specifically, the lecture, problem sets, class discussion and assessment have been designed to appropriately challenge students and support the achievement of the desired learning outcomes. A climate of inquiry and dialogue is encouraged between students and the lecturer and among students (in and out of class). The lecturer aims to provide meaningful and timely feedback to students to improve learning outcome.

### 3.2 Learning Activities and Teaching Strategies

The examinable content of the course is defined by the references given in the Lecture Schedule, the content of Lectures, and the content of the problem sets.

#### *Lectures*

The purpose of Lectures is to provide a logical structure for the topics that make up the course, to emphasize the important concepts and methods of each topic, and to provide relevant examples to which the concepts and methods are applied.

#### *Out-of-Class Study*

This course will be rather demanding. While students may have preferred individual learning strategies, it is important to note that most learning will be achieved outside of class time. Lectures can only provide a structure to assist your study.

An “ideal” strategy (on which the provision of the course materials is based) might include:

1. Attendance at lectures. Here the context and important elements of the topic in the course are identified. The relevance of the topic should be explained.
2. For Classes 1 – 5, which covers theoretical topics, review the contents after the lecture, especially when you find difficulty. If reviewing does not bring you a clear understanding of the contents, capitalize on the consultation hours.
3. For Classes 6 – 12, which covers empirical literature, read the assigned readings and try the problem sets **before the lecture**. This is a **requirement**. This is essential for you to understand the lecture and participate in the class discussion. You will internalize the concepts and models much more clearly if you spend time struggling with the material before lectures.
4. Attempt all the problem sets and assigned project.

## 4 ASSESSMENT

### 4.1 Formal Requirements

In order to pass this course, you must:

- achieve a composite mark of at least 50 out of 100; and
- make a satisfactory attempt at ALL assessment tasks (see below).

### 4.2 Assessment Details

Assessment Task	Weighting	Learning Outcomes assessed	ASB Graduate Attributes assessed	Due Date
-----------------	-----------	----------------------------	----------------------------------	----------

Theory Problem Set	10%	1, 2, 4	1, 5, 6	noon, 29 March (Mon)
Theory Project	10%	1, 2, 3, 4	1, 2, 3, 5, 6	noon, 12 April (Mon)
Class Participation	10%	1, 5, 6	1, 2, 3, 5, 6	
Empirical Problem Sets	10%	1, 5, 6	1, 5, 6	
Final Exam	60%	1, 2, 4, 5, 6	1, 2, 5, 6	University Exam Period
Total	100%			

### 4.3 Theory Problem Set

There will be one theory problem set that counts 10 marks out of 100. It will be given in Class 2 and due at noon on March 29 (Monday). Students must submit their work to the lecturer either in person or electronically by email to [s.maruyama@unsw.edu.au](mailto:s.maruyama@unsw.edu.au). If you fail to submit your assignment before the deadline you will be given a mark of zero.

### 4.4 Theory Project

There will be one theory project that counts 10 marks out of 100. This is expected to give students an opportunity to develop their own theoretical model under a real-world topic and present it. Students may work in groups of up to three students. Students must submit their work by noon, 12 April to the lecturer, either electronically by email to [s.maruyama@unsw.edu.au](mailto:s.maruyama@unsw.edu.au) or in person. On 13 April (Class 5), students will be asked to make a short presentation on their models.

The assessment will be based on the submitted work, but the presentation is required for the project to be marked. Marking criteria are:

- Whether the work is appropriately based on what are taught in classes (20%);
- Discussion of why particular models are chosen in the given topic (10%);
- Whether the analytical work (derivation, calculation, applying concepts taught) is conducted accurately (50%);
- Addition of creative, interesting or realistic twists (20%).

Students who do not attend and do not have adequate reason will be awarded a mark of zero. Documentary evidence for an absence (e.g. medical certificate for serious illness) must be provided to the Lecturer-in-charge within 3 days of the presentation. If approved, the student will have the project marked based on what is submitted.

Further details of the project and the format of presentation will be provided in class.

### 4.5 Class Participation and Empirical Problem Sets

In the second part of the course, we will read and discuss one empirical research paper per week. Each empirical paper is accompanied by a problem set. Students should carefully read the paper in advance and have the problem set ready for submission.

In each meeting in the second part of the course, I will “cold call” students (ask one specific student to answer several questions, without asking for volunteers). I will also ask for volunteers for some questions. The participation grade will depend on performance in a cold call, and on

volunteered contributions. Higher marks will be given for students who contribute to class discussion in relevant and constructive ways.

Working in groups on the empirical problem sets is encouraged, but everyone must talk in class, not defer to a group spokesperson. Make a real attempt on all the questions, even the hard ones, as everyone can be cold-called. On several occasions (chosen at random) I **will collect students' answers** to the questions, and the average of these will constitute the grade for 'empirical problem sets'.

#### **4.6 Assignment Submission Procedure**

It is your responsibility to keep an extra copy of the assignment in case the original is lost or damaged. To be marked adequately, your assignment should be typed or clearly handwritten.

#### **4.7 Late Submission of Assignment**

Assignments submitted late will not be marked.

#### **4.8 Final Exam Format**

The final exam will be 2 hours and comprised of two compulsory sections, one theoretical and one empirical.

### **5 ACADEMIC HONESTY AND PLAGIARISM**

The University regards plagiarism as a form of academic misconduct, and has very strict rules regarding plagiarism. For UNSW's policies, penalties, and information to help you avoid plagiarism see: <http://www.lc.unsw.edu.au/plagiarism/index.html> as well as the guidelines in the online ELISE tutorial for all new UNSW students:

<http://info.library.unsw.edu.au/skills/tutorials/InfoSkills/index.htm>.

To see if you understand plagiarism, do this short quiz:

<http://www.lc.unsw.edu.au/plagiarism/plagquiz.html>

For information on how to acknowledge your sources and reference correctly, see:

<http://www.lc.unsw.edu.au/onlib/ref.html>

For the ASB Harvard Referencing Guide, see:

[http://wwwdocs.fce.unsw.edu.au/fce/EDU/harvard\\_ref\\_guide.pdf](http://wwwdocs.fce.unsw.edu.au/fce/EDU/harvard_ref_guide.pdf)

In the School of Economics all cases of substantial plagiarism are reported to the Associate Head of School. The following penalties will apply:

- Reduction in marks for the assessment item, including zero;
- Failure in the course [00FL] in extreme cases;
- Other additional penalties in accordance with the UNSW Procedures for Dealing with Student Plagiarism, may be considered in extreme cases;
- All cases will be recorded on the UNSW Plagiarism Central Register

### **6 COURSE EVALUATION AND DEVELOPMENT**

Each year feedback is sought from students and other stakeholders about the courses offered in the School and continual improvements are made based on this feedback. UNSW's Course and Teaching Evaluation and Improvement (CATEI) Process is one of the ways in which student evaluative feedback is gathered. You are strongly encouraged to take part in the feedback process.

## 7 STUDENT RESPONSIBILITIES AND CONDUCT

Students are expected to be familiar with and adhere to university policies in relation to class attendance and general conduct and behaviour, including maintaining a safe, respectful environment; and to understand their obligations in relation to workload, assessment and keeping informed.

Information and policies on these topics can be found in the 'A-Z Student Guide': <https://my.unsw.edu.au/student/atoz/ABC.html>. See, especially, information on 'Attendance and Absence', 'Academic Misconduct', 'Assessment Information', 'Examinations', 'Special Consideration', 'Student Responsibilities', 'Workload' and policies such as 'Occupational Health and Safety'.

### 7.1 Workload

It is expected that you will spend at least **ten hours** per week studying this course. This time should be made up of reading, research, working on exercises and problems, and attending classes. In periods where you need to complete assignments or prepare for examinations, the workload may be greater.

Over-commitment has been a cause of failure for many students. You should take the required workload into account when planning how to balance study with employment and other activities.

### 7.2 Attendance

Your regular and punctual attendance at lectures is expected in this course. University regulations indicate that if students attend less than 80% of scheduled classes they may be refused final assessment.

### 7.3 Keeping Informed

You should take note of all announcements made in lectures or on the course web site. From time to time, the University will send important announcements to your university e-mail address without providing you with a paper copy. You will be deemed to have received this information. It is also your responsibility to keep the University informed of all changes to your contact details.

### 7.4 SPECIAL CONSIDERATION AND SUPPLEMENTARY EXAMINATIONS

You must submit all assignments and attend all examinations scheduled for your course. You should seek assistance early if you suffer illness or misadventure which affects your course progress. For advice on UNSW policies and procedures for granting special consideration and supplementary exams, see:

'UNSW Policy and Process for Special Consideration':  
<https://my.unsw.edu.au/student/atoz/SpecialConsideration.html>

## **Policy and Process for Special Consideration**

1. Applications for special consideration (including supplementary examinations) must go through UNSW Central administration within 3 working days of the assessment to which it refers – applications will **not** be accepted by teaching staff;
2. Applying for special consideration **does not** automatically mean that you will be granted a supplementary exam.
3. Special consideration requests **do not allow** lecturers-in charge to award students additional marks;
4. If you are making an application for special consideration (through UNSW Central Administration) please notify your Lecturer in Charge

## **Policy re requests for Special Consideration**

The policy of the School of Economics is that the Lecturer-in-charge will need to be satisfied on each of the following before agreeing to or supporting a request for special consideration:

1. For a medical certificate to be accepted, the degree of illness must be stated by the medical practitioner (severe, moderate, mild). A certificate without this will not be valid;
2. Has the student performed satisfactorily in the other assessment items? Satisfactory performance would require at least 40% in each assessment item specified in the Course Outline and meeting the obligation to have attended 80% of tutorials;
3. History of previous applications for special consideration. Previous applications may preclude a student from being granted special consideration;

## **Special Consideration and Assessments other the Final Exam**

For the application of special consideration to assessment items other than the final exam, refer to the specific policies outlined. The School of Economics does not provide supplementary assessment items other than for the final exam.

## **Special Consideration and the Final Exam**

**Lecturer's note:** If you are too ill to perform reasonably on the final exam, do not attend the final and apply for a supplementary instead. If a student attends the regular final, s/he is unlikely to be granted a supplementary exam.

Requests for special consideration in relation to the final exam are determined by an ASB Faculty panel to which Lecturers-in-charge provide their recommendations for each request. If the Faculty panel grants a special consideration request, this may entitle the student to sit a supplementary examination. In such cases the following procedures will apply:

1. Supplementary exams will be scheduled centrally and will be held approximately two weeks after the formal examination period. Actual date will be advised by mid-semester;
2. Where a student is granted a supplementary examination as a result of a request for special consideration, the student's original exam (if completed) will not be marked and only the mark achieved in the supplementary examination will count towards the final grade. To be

clear, failure to attend the supplementary exam will not entitle the student to have the original exam paper marked and will result in a zero mark for the final exam.

The 'ASB Policy and Process for Special Consideration and Supplementary Exams in Undergraduate Courses' is available at:

<http://wwwdocs.fce.unsw.edu.au/fce/current/StudentSuppExamProcedure.pdf> .

## 8 STUDENT RESOURCES AND SUPPORT

The University and the ASB provide a wide range of support services for students, including:

**ASB Education Development Unit (EDU)** ([www.business.unsw.edu.au/edu](http://www.business.unsw.edu.au/edu))

Academic writing, study skills and maths support specifically for ASB students. Services include workshops, online and printed resources, and individual consultations. EDU Office: Room GO7, Ground Floor, ASB Building (opposite Student Centre); Ph: 9385 5584; Email: [edu@unsw.edu.au](mailto:edu@unsw.edu.au)

**UNSW Learning Centre** ([www.lc.unsw.edu.au](http://www.lc.unsw.edu.au) )

Academic skills support services, including workshops and resources, for all UNSW students. See website for details.

**Library training and search support services:** <http://info.library.unsw.edu.au>

**UNSW IT Service Desk:** Technical support for problems logging in to websites, downloading documents etc. Library, Level 2; Ph: 9385 1333.

Website: [www.its.unsw.edu.au/support/support\\_home.html](http://www.its.unsw.edu.au/support/support_home.html)

**UNSW Counselling Service** (<http://www.counselling.unsw.edu.au>)

Free, confidential service for problems of a personal or academic nature; and workshops on study issues such as 'Coping with Stress' and 'Procrastination'.

Office: Level 2, Quadrangle East Wing; Ph: 9385 5418

**Student Equity & Disabilities Unit** <http://www.studentequity.unsw.edu.au>)

Advice regarding equity and diversity issues, and support for students who have a disability or disadvantage that interferes with their learning. Office: Ground Floor, John Goodsell Building; Ph: 9385 4734

## 9 COURSE RESOURCES

### 9.1 Course Website

The website for this course is on UNSW Blackboard at:

<http://lms-blackboard.telt.unsw.edu.au/webapps/portal/frameset.jsp>

The website will contain copies of:

- All course handouts;
- Lecturer notes;
- Assignments;
- Readings;
- Announcements.

Students should consult this website at least once a week as it contains important information about the course. It will be assumed that all students have seen any notice posted on the course website.

### 9.2 Textbook and Other Readings

**Recommended textbook:** J. Tirole, (1988), *The Theory of Industrial Organization*, MIT Press.

Tirole is the recommended text and is the standard for a course at this level. You may however want to refer to the following less advanced text book:

(Undergraduate Level)

D. Carlton, and J. Perloff (2005), *Modern Industrial Organization*, Pearson Addison Wesley.

The readings covered in the lectures are listed in the lecture schedule below. Students may also find the following advanced level textbooks useful for some parts of the course.

X. Vives, (1999), *Oligopoly Pricing: Old Ideas and New Tools*, MIT Press.

K. Basu, (1993), *Lectures in Industrial Organization Theory*, Blackwell Publishers.

O. Shy, (1995), *Industrial Organization: Theory and Applications*, MIT Press.

For more readings in the empirical literature, advanced students may find the following websites of top researchers useful:

Philip Haile, Ford Foundation Professor of Economics, Department of Economics, Yale University: <http://www.econ.yale.edu/~pah29/>

Liran Einav, Associate Professor, Department of Economics, Stanford University: <http://www.stanford.edu/~leinav/>

Aviv Nevo, Professor, Department of Economics, Northwestern University: <http://faculty.wcas.northwestern.edu/~ane686/>

## 10 COURSE SCHEDULE

Lectures start in Week 2 and finish in Week 13. This course does not meet in Week 1.

The following schedule is tentative. Not necessarily all of the following topics will be taught. The depth and inclusion of topics will be adapted to the size, interest and composition of the students.

The first part of the course discusses basic issues of monopolistic and oligopolistic markets with theoretical models. We conclude the first part with assigned student presentations in Class 5. The second part of the course is an introduction to empirical industrial organisation. We will read and discuss top quality empirical research papers, aiming to present students the frontier of the relatively new field called New Empirical IO.

**Class 1:** 9 March Introduction & Basic Monopoly and Price Discrimination; Introduction to Game Theory with Perfect Information

- Tirole, Chapter 1 (Section 1.1.1), Chapter 3 (Sections 3.1, 3.2)
- Tirole, Chapter 11 (Sections 11.1 – 11.3)

**Class 2:** 16 March Models of Oligopoly with Homogeneous Product

A. *Bertrand competition, Cournot competition, solutions to the Bertrand Paradox*

- Tirole, Chapter 5 (Sections 5.1 – 5.4, 5.7.2)
- Kreps, D. and J. Scheinkman (1983), “Quantity Precommitment and Bertrand Competition Yield Cournot Outcomes,” *Bell Journal of Economics*, **14**, 326-337.

B. *Antitrust Analysis of horizontal mergers*

- Salant, S. W., S. Switzer, and R.J. Reynolds (1983), “Losses from Horizontal Merger: The Effects of an Exogenous Change in Industry Structure on Cournot-Nash Equilibrium,” *Quarterly Journal of Economics*, **XCVIII**, 185-199.
- Deneckere, R. and C. Davidson (1985), “Incentives to Form Coalitions with Bertrand Competition,” *RAND Journal of Economics*, **16**, 473-486.
- Farrell, J. and C. Shapiro (1990), “Horizontal Mergers: An Equilibrium Analysis,” *American Economic Review*, **80**, 107-126.

C. *Entry and Social Efficiency*

- Mankiw, G. and M. Whinston (1986), “Free Entry and Social Inefficiency,” *RAND Journal of Economics*, **17**, 48-58.
- Ghosh, A. and H. Morita (2006), “Free Entry and Social Efficiency under Vertical Oligopoly,” *RAND Journal of Economics*, 38(2): 539-552.

**Class 3:** 23 March Dynamic Competition and Collusion; Entry

- Tirole, Chapter 6.
- Rotemberg, J. J. and G. Saloner, “A Supergame-Theoretic Model of Price Wars During Booms,” *American Economic Review*, 76 (June 1986), 390-407.
- Green, E. and R. Porter, “Non-cooperative Collusion Under Imperfect Price Information,” *Econometrica*, 52 (January 1984), pp. 87-100.
- Tirole, Chapter 8

**Class 4:** 30 March Product Differentiation: Price Competition and Non-Price Competition

- Tirole, Chapter 7

**Mid-semester Break**

**Class 5:** 13 April Student Presentations; Empirical Method

**Class 6:** 20 April Reduced-Form Approach

- Gibson and Harris (1996), “Trade Liberalisation and Plant Exit in New Zealand Manufacturing”, *Review of Economics and Statistics*, 78(3), 521-529.

**Class 7:** 27 April Collusion I: Bresnahan [1987]

- Bresnahan, T. (1987), “Competition and Collusion in the American Automobile Market; The 1955 Price War”, *Journal of Industrial Economics*, 14(2), 301-314.

**Class 8:** 4 May Collusion II: Porter [1983]

- Porter R (1983), “A Study of Cartel Stability: The Joint Executive Committee, 1880-1886,” *Bell Journal of Economics*, 14(2), 301-314.

**Class 9:** 11 May Entry: Bresnahan and Reiss [1991]

- Bresnahan, T. and P. Reiss (1991), “Entry and Competition in Concentrated Markets”, *Journal of Political Economy*, 99(5), 977-1009.
- Manuszak, M. (2002), “Endogenous Market Structure and Competition in the 19th century American Brewing Industry,” *International Journal of Industrial Organization*, 60: 673-692.

**Class 10:** 18 May Entry & Product Differentiation: Mazzeo [2002]

- Mazzeo, M. (2002), “Product Choice and Oligopoly Market Structure”, *RAND Journal of Economics*, 33(2):221-242.

**Class 11:** 25 May Auction

- J. Laffont (1997), “Game Theory and Empirical Economics: The Case of Auction Data,” *European Economic Review*, January, 1-35.
- J. Laffont, H. Ossard and Q. Vuong, (1995), “Econometrics of First Price Auctions,” *Econometrica*, July, 953-80.

**Class 12:** 1 June Experimental Industrial Organisation

- McDonald, I. (2008), “For the Student: Behavioural Economics”, *The Australian Economic Review*, 41(2): 222-8.
- Hinloopen, J. (2008), “Laboratory Evidence on the Effectiveness of Corporate Leniency Programs”, *RAND Journal of Economics*, 39(2):607-616.

## 11 KEY DATES AND STUDENT RESPONSIBILITIES

*It is your responsibility to ensure that:*

1. You are recorded by the University as being correctly enrolled in all your courses.
2. You have successfully completed all prerequisite courses. Any work done in courses for which prerequisites have not been fulfilled will be disregarded (unless an exemption has been granted), and no credit given or grade awarded.
3. You abide by key dates:  
**Monday 1 March** is the first day of Semester 1 lectures. **Sunday 7 March** is the last day you can enrol in Semester 1 courses.  
**Sunday 7 March** is the due date for Semester 1 fees.  
**Wednesday 31 March (Week 5)** is the last day for students to discontinue without financial penalty (and the last date to finalise arrangements for HECS-HELP and FEE-HELP).  
**Sunday 25 April (end Week 7)** is the last day to discontinue without academic penalty.
4. You organise your affairs to take account of examination and other assessment dates where these are known. Be aware that your final examination may fall at any time during the semester's examination period. The scheduling of examinations is controlled by the University administration. No early examinations are possible. The examination period for Semester 1, 2010, falls between **Friday 11 June** and **Monday 28 June (provisional dates subject to change)**.
5. When the provisional examination timetable is released, ensure that you have no clashes or unreasonable difficulty in attending the scheduled examinations. The final examination timetable for Semester 1 is released in May (date TBA).
6. Note that some Schools schedule a common date for any **supplementary exams** that may be required – it is your responsibility to check the School websites and ensure that you are available to take the exam on the scheduled date.

A full list of UNSW Key Dates is located at:

<https://my.unsw.edu.au/student/resources/KeyDates2.html>
